Both participants were very satisfied with the 5-day Development Programme module. They learned about our Internal Audit methodology, i.e. process and procedure, covering both theory and practical aspects. A business trip to our client’s office was a useful experience as it created opportunities for the participants to speak in-person on Internal Audit. Moving forward, we will organize more exchange programmes to create opportunities for member firms to learn about the culture of other countries and best practices with regard to the business environment we operate in.
